

CURRICULUM VITAE

Prof. Ing. Vincenzo Sepe

*Associate Professor
of Structural Mechanics (Scienza delle Costruzioni)
Università “G. d’Annunzio” of Chieti-Pescara*

Department of Engineering and Geology

vincenzo.sepe@unich.it

February 2026

Born in Naples (Italy) in 1962, Vincenzo Sepe got a Degree in Civil Engineering (summa cum laude) from the University of Naples “Federico II” in 1987, with a Thesis in Geotechnics.

After the PhD in Structural Engineering at the University of Florence, with a Thesis in Dynamics of rigid blocks with unilateral contacts, defended in 1992, he was Assistant Professor (Ricercatore) of Structural Mechanics at the Faculty of Engineering of the University of Rome “La Sapienza” from 1993 to 2001; for several years he taught in that Faculty the Course of Fundamentals of Structural Mechanics for the Bachelor (Diploma Universitario, later Laurea Triennale) in Architectural Engineering (in Rieti) and the Course of Statics for the Degree in Architectural Engineering, and in 1998 the Course of Structural Dynamics in the Faculty of Engineering of the Third University of Rome.

Since November 2001, he has been a full-time Associate Professor of Structural Mechanics (Scienza delle Costruzioni) at the University “G. d’Annunzio” of Chieti – Pescara, where he belongs to the Department of Engineering and Geology. He teaches the Course of Structural Mechanics for the five-year Master Degree in Architecture LM-4 and the Course of Diagnostics and Control of Constructions for the Master Degree in Construction Engineering LM-24.

His current research activity is aimed at various aspects of the dynamic response of civil structures under seismic and wind actions, the diagnostics of existing buildings, structural modelling of masonry buildings, and structural identification. He has also conducted research in the field of seismic vulnerability of buildings and historic centers.

He has participated to several research projects, both Italian (financed by MURST-MIUR (Italian Ministry for Instruction, University and Research) or CNR (Italian Research Council)) and international (financed by the European Commission) in the field of structural dynamics and wind engineering.

Vincenzo Sepe is author or co-author of about 160 publications (→ [link](#)).

He has been member of the Organising and/or Scientific Committee of several Italian Conferences IN-VENTO on Wind Engineering (Rome 1994, Trieste 1996, Perugia 1998, Reggio Calabria 2004, Spoleto 2010, Venezia 2012, Pisa 2024, Bari 2026) and he has been the secretary of the Organising Committee of the Conference IN-VENTO-2006, held in June 2006 in Pescara.

He has been advisor of seven PhD Theses and advisor of many degree theses in Structural Mechanics and Structural Dynamics.

Since 1994, he has been affiliated with CRIACIV (Interuniversity Research Center for Aerodynamics of Structures and Wind Engineering, which over the years has expanded to currently include the Universities of Florence, Rome “La Sapienza”, Perugia, Trieste, “G. d’Annunzio” of Chieti-Pescara, IUAV of Venice, Padua, and the University of Campania “G. Vanvitelli”), of whose Management Committee he was a member from 1994 to 2009 and of which he has been a member again since 2021.

Since December 2023, he has been affiliated with the Research Center “Uda-TechLab” of the University “G. d’Annunzio” of Chieti-Pescara.
